

Investment advice

ABGSC does not offer investment advice as a separate service. However, our sales and trading desks may provide advice to Professional clients requesting investment advice in connection with our brokerage services.

ABGSC's investment advice is not to be regarded as independent. The investment advice is based on a restricted analysis of products within the range of investment products offered by ABGSC, please see below. ABGSC does not provide investment advice related to portfolio allocation or other portfolio advice, and will not assist clients with developing a general investment strategy.

Product range

ABGSC offers a limited range of investment products within the following categories:

- Listed and unlisted stocks, in particular Nordic stocks
- Listed and unlisted bonds, including new corporate debt issues and secondary traded high yield debt, investment grade and covered bonds
- Derivative instruments, including options, futures and forwards with e.g. shares, currencies or commodities as underlying value

The range of product above includes products manufactured by ABGSC or entities having a close link to ABGSC, and products manufactured by external providers without any link to ABGSC.

Suitability assessment

In relation to investment advice, ABGSC is required to obtain information from the client regarding (i.a.) the client's investment knowledge, financial situation, and investment objectives, for purposes of assessing whether the service or product in question is suitable for the client.

ABGSC only provides advisory services to professional clients and is entitled to rely on a professional client's experience and knowledge and that any resultant risk is understood by the client and that the client has taken the necessary advice and that the client is able financially to bear any related investment risks consistent with the client's investment objectives.

ABGSC will not provide the client with a periodic assessment of the suitability of the financial instruments recommended to that client.

Important information

Investing and trading in financial instruments and other related instruments is associated with a risk of loss. Please note that investments are made and positions in financial instruments are taken only at the client's own risk. This is the case even if the client has received investment advice.

Any recommendations would be provided by ABGSC solely to enable the client to make the client's own investment decisions.
